- 8.Tire Pressure Monitor System Reset**
- 9.Anti-theft Matching**
- 10.Injector matching**
- 11.Air Suspension Reset**
- 12. Gearbox Reset**
- 13.Sunroof RESET**
- 14.AFS Reset**
- 15.EGR Reset**

ECU Coding (Customize)

Uses the ThinkDiag 2 App to modify the adaptive data for vehicle control modules, after repairs or replacements of vehicle parts including:

[Power Window | Illuminated Entry | Warning | Light Control | Slide Roof | Air Conditioner | Display | Unit Conversion | Entry & Start | PSD & PBD Operation | Seat ...]
Active Test (Bi-directional control)

Uses the ThinkDiag 2 App to test if the actuator is normal, without using the vehicle's controls, to get a significant boost in effectiveness:

[Turn on the radiator fan | Modulate the throttle | Open/close windows | Operate mirrors | Turn on/off the lights | Turn on/off the sound horn |

IMMO Key Matching

About Key Programming:Thinkcar thinkdiag supports Add, Delete & Reprogram Keys.

>>>Rewrite smart keys, All smart keys lost, Replace smart key ECU, Replace KNOB IGNITION;

>>>>Reset Key: Relearn a key (Note:this function is NOT universally compatible. Please check compatibility with us if necessary.

Thinkcar thinkdiag supports PIN Code reading for most cars before 2008 ,for vehicles after 2008,you need to have PINCode to do key programming).

Auto Scan Car VIN Code

**Thinkdiag 2 can automatically scan the car's information, include VIN number, release year, model and engine type.
Support 10 OBD2 Full Function**

This diagnostic software can test vehicle Engine systems.All models with engine meeting SAE J1850,ISO9241-2,ISO14230-4,ISO15765 Standard in OBD2&EOBD.

- 1.View freeze frame date**
- 2.support graph data stream**
- 3.O2 Sensor test**
- 4.Evap system test**
- 5.On-Board monitor test**
- 6.Read & Clear DTCs**
- 7.Identify VIN information**
- 8.DTC code look up**
- 9.Turn off MIL(Malfunction Indicator Lights)**
- 10.I/M Readiness status test**
